Munich, July 28, 2025 – 3DSE Management Consultants GmbH has officially joined the Corporate Advisory Board (CAB) of INCOSE (International Council on Systems Engineering). Dr. Armin Schulz, Founder, Managing Director, and Senior Partner at 3DSE, will represent the company on this international expert panel, which plays a key role in shaping the global development of Systems Engineering. 3DSE's entry into the CAB took place on July 26, 2025, during the INCOSE International Symposium in Ottawa, Canada, the world's leading conference on Systems Engineering.

With over 26,000 members in 75 countries, 130 corporate members, and more than 50 active working groups, INCOSE serves as the central platform for international exchange on methods, standards, and innovations for managing complex technical systems.

By joining the CAB, 3DSE strengthens its global presence and contributes its extensive consulting experience from technology-driven industries to the advancement of Systems Engineering. In return, 3DSE gains access to strategically relevant forums, specialized resources, and a global network of leading organizations, including NASA, MIT, Airbus, Ford, John Deere, Cummins, Siemens, IBM, Toshiba, and many others.

Global Perspective and Strategic Value

"Our clients are facing the challenge of managing highly complex systems across globally distributed development structures," explains Dr. Armin Schulz. "Through our membership in the CAB, we are contributing our deep methodological expertise and industry know-how to the international dialogue, while gaining new insights to help our clients transition more effectively to digitally integrated systems."

Customer Value – Industry Impulses

As a CAB member, 3DSE gains:

- Access to over 50 international working groups developing standards, methods, and tools in Systems Engineering
- A voice in shaping the strategic evolution of the discipline
- Entry to exclusive technical publications, certifications, international conferences, and expert platforms
- Early insights into global trends, challenges, and practical solution approaches

INCOSE also views 3DSE as a valuable addition to the CAB.

"With 3DSE, the CAB gains an organization with more than 25 years of experience in implementing Systems Engineering across a variety of industries.

They bring a clear understanding of the challenges companies face in this domain. That perspective is extremely valuable for the further development of Systems Engineering and for the interdisciplinary exchange that defines INCOSE.” – Ralf Hartmann, President, INCOSE

Through this membership, 3DSE not only strengthens its own methodological excellence but also offers its clients qualified access to international developments, collaborative opportunities with key players, and actionable insights for future-ready product development.

About 3DSE

3DSE Management Consultants GmbH partners with the world’s leading technology brands to enhance their R&D competitiveness. As the leading independent management consultancy for innovation and R&D, 3DSE operates from offices in Munich, Vienna, and Chicago. Since its founding in 2001, the firm has successfully completed over 800 consulting projects for more than 80 international clients. Focus areas include agile Systems Engineering, R&D performance improvement, modular product architectures, and disruptive innovation. Core industries served include automotive, mobile machinery, defense, medical devices, rail, and energy.
