Once Again, brand eins and Statista Rank 3DSE Among Germany's Best Management Consultancies 2026

Munich, March 16, 2026 – 3DSE Management Consultants GmbH (3DSE) has once again been recognized by the business magazine brand eins and the statistics portal Statista as one of the top management consultancies in Germany.

The annual study conducted by brand eins and Statista is considered one of the most prestigious industry rankings in the German-speaking region. The award is based on an independent, multi-stage evaluation process that incorporates both expert assessments from the consulting industry and recommendations from executives in companies. Only a select group of consultancies is included in the list of top firms.

The renewed recognition confirms 3DSE's long-standing expertise in sustainably improving the performance of innovation, product development, and R&D organizations. For many years, 3DSE has supported leading companies in making their development activities more efficient, shortening time-to-market, and strengthening their technological competitiveness over the long term.

"We are very pleased to receive this recognition from brand eins once again," says Dr. Armin Schulz, founder and managing partner of 3DSE. "It confirms our ambition to work together with our clients to significantly increase the effectiveness and efficiency of their development organizations and thereby sustainably strengthen their global competitiveness."

Dr. Stefan Wenzel, founder and managing partner of 3DSE, adds: "In many industries today, the performance of product and service development determines market success. Companies must bring innovation to market faster, more efficiently, and with greater impact. This is exactly where we support our clients – with measurable results."

About 3DSE Management Consultants

3DSE Management Consultants GmbH is a leading independent management consultancy specializing in product, innovation, and R&D performance. The company works with global technology leaders to sustainably improve their ability to develop products and services successfully. 3DSE stands for measurable impact: cost reductions of over 25%, time-to-market reductions of more than 30%, and productivity gains by multiples. Its approach combines systems thinking, deep expertise in product development, and a rigorously behavior-driven transformation methodology. Founded in 2001, 3DSE has delivered more than 800 projects for over 80 international clients. The company operates offices in Munich, Vienna, and Chicago.
